Singapore shares continue gaining ground, tracking regional benchmarks; STI up 0.1%

Across the broader market, gainers edge out losers 379 to 222, after 1.4b securities worth S$1.8b change hands. BY BENJAMIN CHER

SINGAPORE stocks ended higher on Tuesday (Feb 10), tracking regional indices.

The benchmark Straits Times Index (STI) gained 0.1 per cent or 3.42 points to finish at 4,964.25.

Across the broader market, gainers edged out losers 379 to 222, after 1.4 billion securities worth S$1.8 billion changed hands. Keppel led the gainers on Singapore's blue-chip index, rising 3.3 per cent or S$0.40 to end at S$12.50.

Coming in at the bottom of the table among STI constituents was Jardine Matheson, which fell 1.3 per cent or US$0.98 to close at US$76.

The three local banks ended mixed on Tuesday. UOB rose 0.6 per cent or S$0.22 to S$38.92, while DBS fell 0.7 per cent or S$0.39 to S$57.80, and OCBC finished 0.3 per cent or S$0.06 lower at S$21.32. The iEdge Singapore Next 50 Index gained 1.1 per cent or 16.67 points to 1,509.95.

Topping the index was Centurion, which rose 5.4 per cent or S$0.08 to S$1.57. The index's biggest loser was Keppel Infrastructure Trust, which fell 2.7 per cent or S$0.015 to S$0.535.

Across the region, most benchmark indices closed higher, with the Nikkei 225 rising 2.3 per cent, the Hang Seng Index gaining 0.6 per cent and the Kopsi edging up 0.1 per cent. Bucking the trend was the FTSE Bursa Malaysia KLCI, which shed 0.2 per cent.

In the US, investor sentiment is pushing the Dow Jones Industrial Average to new highs as money managers pile into cyclical industries, said Jose Torres, senior economist at Interactive Brokers.

The election victory of Japanese Prime Minister Sanae Takaichi is propelling animal spirits, as she can now pursue heavier spending and taxation relief.

"Measures that serve to bolster economic conditions and corporate earnings in the short run, while carrying the potential risk of raising term premiums and lifting long-end sovereign borrowing costs as a result throughout the globe," said Torres.

CURRENCIES

Yen extends gains after Takaichi election victory

THE US dollar extended Monday's (Feb 9) decline against the yen after Prime Minister Sanae Takaichi's election victory, while remaining little changed against European currencies before key economic data due on Wednesday.

The Japanese currency snapped a six-day losing streak on Monday after falling towards the 160 threshold against the greenback, triggering fears of intervention by Japanese authorities to support the yen.

However, analysts also noted that Takaichi's policy, which includes tax cuts and more fiscal spending, is expected to boost the economy and lift the stock market, potentially prompting the Bank of Japan to take a more hawkish stance, all factors that could support the yen.

The yen rose 0.43 per cent to 155.21 against the dollar after jumping 0.85 per cent the day before.

It was up 0.54 per cent at 184.77 versus the euro after being roughly unchanged on Monday.

"With Prime Minister Sanae Takaichi moving from a relatively fiscally conservative stance to one favouring carefully targeted stimulus, the balance of risks has tilted toward additional tightening from the Bank of Japan," said Harvey Bradley, co-head of global rates at Insight Investment, arguing that a neutral rate around 1.5 per cent looks reasonable.

Takaichi's snap election was aimed at consolidating her position, he said, "but a realignment among opposition parties may complicate that ambition and should reassure markets that the fiscal outlook is not going to meaningfully deteriorate".

Political analysts had suggested that Takaichi's strong mandate might give her room to moderate the plan, as opposition parties calling for even bolder tax cuts suffered heavy defeats at the ballot box. Investor attention this week will be especially on the monthly reports covering US employment and consumer prices that were pushed back slightly due to a recent three-day government shutdown in the United States.

White House economic adviser Kevin Hassett said on Monday that US job gains could be lower in the coming months due to slower labour force growth and higher productivity.

Investors are trying to assess whether weakening in the labour market has tapered off.

The dollar index, which measures the greenback against six other currencies, was down 0.05 per cent at 96.88, after hitting a fresh one-week low at 96.789.

Meanwhile, European Central Bank (ECB) president Christine Lagarde played down concerns that euro-dollar would influence the ECB's policy path, though the currency dynamic remains a key focus for market participants.

"I would assume that the ECB is also uncomfortable with the strong focus on the euro's appreciation and will probably only react more strongly if the appreciation becomes even more pronounced," said Michael Pfister, a forex analyst at Commerzbank.

He said the question of what euro-dollar level might prove too high for the ECB has become the hot topic in client discussions.

The common currency dropped 0.10 per cent to US$1.1905 after a 0.85 per cent jump on Monday.

The dollar index, which measures the greenback against six other currencies, was at 96.79, hovering near a one-week low. REUTERS
