

# Current versus target

|                                                      | CURRENT                                                                                                                | TARGET                                                                    |
|------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|
| Integrated Digital Delivery                          | About 80% of large consultants and 60% of large builders use BIM technology                                            | (No target set, as the initiative is quite new)                           |
| Design for Manufacture and Assembly                  | 10+% of projects adopt DfMA methods                                                                                    | To increase adoption to 40% by 2020                                       |
|                                                      | Three Integrated Construction & Prefabrication Hubs (ICPH) in operation, two under construction, one undergoing tender | Up to 10 ICPHs by 2020                                                    |
| Green Buildings                                      | About 33% of buildings in Singapore are green                                                                          | To have at least 80% of the buildings in Singapore labelled green by 2030 |
| Number of professionals across all three disciplines | 32,600                                                                                                                 | 80,000                                                                    |
