

Productivity metrics

Value-added v year

	2011	2012	2013	2014
	% CHANGE Y-O-Y			
Value added per worker	2.7	2.2	-2.6	-2.3
Site productivity	0.8	1.3	1.5	2.0

Value added productivity

$$= \frac{\text{Construction value added (S\$)}}{\text{Total number of employees in the sector}}$$

Site productivity

$$= \frac{\text{Total constructed floor area (in sq m)}}{\text{Manpower used on site (in man-days)}}$$

Note: 1 man-day is defined as
1 man working for 8 hours
