Yen gains after Takaichi win; greenback eases

THE yen strengthened on Monday (Feb 9) after Japanese Prime Minister Sanae Takaichi's election victory, reversing six consecutive days of losses as traders bet that fiscal stimulus will boost the stock market, while the US dollar eased against other major currencies.

The yen initially pulled back slightly after Takaichi's win on Feb 8, reaching its weakest in two weeks, but it strengthened as the trading day continued. The US dollar was last around 0.5 per cent lower against the yen at 156.36.

The Japanese currency also retracted losses against other currencies, which earlier saw it reach its weakest level on record against the Swiss franc and trade near the weakest point since the creation of the euro.

"While the initial yen weakness may not have played out, the outlook for the yen is still one which is likely to struggle to strengthen," said Sim Moh Siong, currency strategist at OCBC in Singapore. "At least in the near term, there's also concern about intervention risk, which may be capping the upside for dollar-yen."

Japan's top currency diplomat Atsushi Mimura said earlier on Monday that the government is "closely watching currency movements with a high sense of urgency" after Takaichi's coalition swept to a historic election win.

Societe Generale head of FX strategy Kit Juckes said there is "no doubt that this gives Takaichi a mandate for a pro-growth policy stance, and it's a fight between that

being a good thing and debt dynamics, which have been worrying the market".

Juckes said the long end of the Japanese government bond market

had so far not reacted negatively to Takaichi's win, and as long as this remained the case, the yen was temporarily safe.

However, David Chao, global

The Japanese government is monitoring currency movements after Sanae Takaichi's coalition swept to a historic election victory. PHOTO: REUTERS

market strategist for Asia-Pacific at Invesco in Singapore, said some volatility is expected "as markets assess the implications of the Liberal Democratic Party's (LDP) landslide victory for currency dynamics".

"Under a reinvigorated LDP mandate, fiscal policy is likely to turn more expansionary, with measures such as a consumption tax cut on food now more likely," he said.

Elsewhere, the US dollar index, which measures the greenback's strength against a basket of six currencies, was down 0.4 per cent at

97.23, at the start of a week in which there will be several key data releases out of Washington, including retail sales, inflation and Wednesday's delayed jobs report.

"I don't think the dollar can weaken much unless the economy slows significantly," said Juckes, adding that this was nonetheless a possible scenario. Traders are weighing their bets on policy easing from the Federal Reserve later this year.

The euro was last around 0.5 per cent higher against the US dollar at US\$1.1874. The pound was last around 0.2 per cent higher against the greenback after trading flat earlier in the day, but remained lower against the euro, as markets considered developments in a political crisis. REUTERS
