

Fiesta Stock Exchange

This game simulates the workings of a stock exchange. The objective is to give a feel of how investments work, and the risks and returns involved.

Participants choose to purchase either a share or a bond, and specify the amount of carnival stamps they wish to invest. Then, they spin the carnival wheel to determine the current economic climate. 20% of the wheel is titled "Recession", 35% of the wheel is titled "Boom" and 45% of the wheel is titled "Stable". The participants' decision on the number of stamps to invest, whether to purchase a share or a bond, and the result of the spun wheel would determine the reward they receive.
