

Green policy initiatives in South-east Asia

COUNTRY	INITIATIVES
Malaysia	Schemes such as Green Investment Tax Allowance Projects and Green Income Tax Exemption Services seek to encourage the purchase and use of green technology and green technology services and systems.
The Philippines	Enhanced deductions for R&D of green projects and labour force training for green jobs.
Singapore	Slew of incentives under the Singapore Green Plan, ranging from tax depreciation to grants and a reduction in carbon taxes to support projects that advance Singapore's environmental sustainability goals.
Thailand	General incentives covering a range of projects, including those of Bio-Circular-Green (BCG) companies; renewable smart visas for BCG companies to allow international talent and investors to work and stay in Thailand.
Vietnam	Tax incentives for renewable energy projects such as lower tax rates, exemption from import duties and land-related incentives.
