The impact of cyber attacks

Cyber crimes cost **US$575 billion** per year.

In 2016 hackers...

- Withdrew **US$81 million** from the Bangladesh Central bank.

- Accessed and leaked the details of **3.2 million** customer cards from several Indian banks.

- Stole **US$65 million** of bitcoins from Hong Kong-based digital currency exchange Bifinex13.

- Used malware to steal **US$2.17 million** from eight banks in Taiwan.

In 2017...

- Korea's seven main banks were threatened with a distributed denial of service attacks should they fail to pay a ransom.
