

SWING IN STYLE

PLAY IT COOL ON THE GREEN AND 19TH HOLE
BY KOVIT ANG

Technology has been weaved into golf fashion, keeping you cool on the green and after the game. This season, Puma strategically placed adaptive materials to help you maintain an optimum body temperature without losing your momentum. Ceramic print that retains heat next to the body creates roughly a 3 deg C warmer microclimate by holding and dispersing body heat. The new tech material draws sweat away from your skin to keep you dry, maintaining optimum body temperature. It offers breathable, water repellent protection against wind and rain.
